

AVOCET ACADEMY TRUST ENERGY CASE STUDY

Avocet Academy Trust is a small independent Multi Academy Trust made up of four primary schools in East Suffolk. The trust came to our team to support with proactive management of invoices and accounts.

OBJECTIVES

- To manage the trust's energy accounts and invoices pro-actively, providing them with the best value for money
- To provide an approachable and knowledgeable service team to give support to the trust as required.

SOLUTION

- We used our buying power to secure the best value for their energy pricing now and moving forward
- In addition, day to day service levels complement this with friendly, approachable staff who are always willing to provide support with any queries on their accounts and act as a liaison point between each school and the utility companies.

BENEFITS

We worked together to create a “one stop shop” where members of staff across the trust can feel confident that if they have a problem they can contact Vertas and receive expert advice. They have confidence that their issue will be taken up with the utility companies and resolved in as swift and efficient a manner as possible.
