- Other bespoke services
- Review of Health and Safety Management Systems / Gap Analysis

Training

- Premises Management Training
- First Aid Training
- Fire Awareness Training
- Legionella Awareness
- Fire Warden Training
- Asbestos Awareness

Health and Safety Compliance Services

Fire Risk Assessment

The Regulatory Reform (Fire Safety) Order 2005 states that every non-domestic premises must have a current, suitable and sufficient Fire Risk Assessment (FRA) in place.

A current FRA shows that you have taken fire safety management seriously and taken ownership of managing these risks within your premises to the enforcing authority. We conduct and provide a thorough FRA of your premises and provide a prioritised action plan which clearly identifies areas of non-compliance which require additional controls. We can also provide a detailed drawing of your building that shows the position of all the fire protection measures.

The FRA will include the following key areas:

- Identify fire hazards
- Identify people at risk
- Evaluate key areas and provide advice on removing or reducing the risks
- Record significant findings and recommended remedial actions to comply

Health and Safety Premises Compliance Assessment

To support you with compliance under the Health & Safety at Work Act 1974, we can offer a full Health & Safety assessment of your premises, working practices and documentation. We will discuss our findings and provide an action plan including advice and guidance documentation to suit your needs.

Key Areas:

- Policies and procedures
- Risk assessments
- Fire management
- Maintenance records for mechanical and non-mechanical equipment

Benefits :

- Ensures you comply with current Health and Safety legislation
- Reduces possible accidents and injuries within your premises
- Identifies significant hazards for the implementation of controls to remove them
